REBYOTA® Product Carton

Contains:

- 150-mL microbiota suspension
- Prescribing information

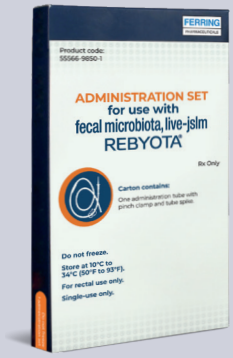

STORAGE[1]

ULTRA LOW FREEZER
(-60˚C to -90˚C, -76˚F to -130˚F)

REFRIGERATOR
(2˚C to 8˚C, 36˚F to 46˚F)

MAX 5 DAYS

Administration Set Carton

Contains:

- Administration set for use with REBYOTA (one tube with pinch clamp and tube spike).

STORAGE

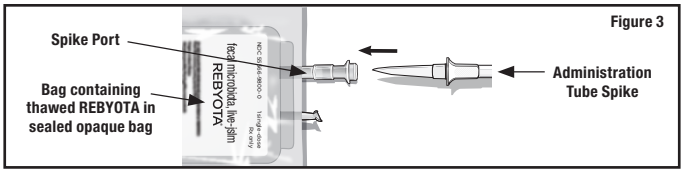

- **Do not freeze.**

INTENDED USE

- **For rectal use only.**
- **Single-use only.**

Before Using

1. Thaw REBYOTA completely by placing the orange and white product carton in a refrigerator (2˚C to 8˚C, 36˚F to 46˚F) for at least 24 hours, but no more than 5 days. *Condensation is normal after thawing.*[1]
2. Remove the REBYOTA bag from the orange and white carton, leaving the opaque wrapper on.
3. Color and consistency may vary. Consider mixing product by gently massaging the bag.[2]
4. Remove the administration tube from the blue and white administration set carton. Close the clamp on the tubing, using two hands if needed. There is no need to prime the tubing.[1]
5. Affix administration tube and ensure spike port is fully seated into product port. [1]
